SUBJECT INDEX

Acompsomyces stenichni
Further records of Laboulbeniales from collections of British Coleoptera 433

Acremonium
Isozyme relationships of *Acremonium* endophytes from twelve *Festuca* species 25

Acremonium coenophialum
Isozyme relationships of *Acremonium* endophytes from twelve *Festuca* species 25

Acremonium starrii
Isozyme relationships of *Acremonium* endophytes from twelve *Festuca* species 25

Acremonium uncinatum
Isozyme relationships of *Acremonium* endophytes from twelve *Festuca* species 25

Adhesion
Fungal adhesion 961
The role of hydrophobicity in attachment of urediniospores and sporelings of *Uromyces viciae-fabae* 1217

Aeciospores
Axenic culture of the aecial state of *Cronartium flaccidum* from Italy 1258

Aflatoxins
Possible role of ergosterol oxidation in aflatoxin production by *Aspergillus parasiticus* 363
Isolation and characterization of morphological variants of *Aspergillus parasiticus* deficient in secondary metabolite production 645

Agaricus bisporus
Mechanical properties of the mushroom, *Agaricus bisporus* 241

Agglutinins
Agglutinins (lectins) from some British higher fungi 277

Agropyron repens
The use of random amplified polymorphic DNA to identify pathotype and detect variation in *Pseudocercosporella herpotrichoides* 13

Alternaria alternata
Water relations of *Alternaria alternata*, *Cladosporium cladosporioides*, *Cladosporium sphaerospermum*, *Curvularia lunata* and *Curvularia pallescens* 91
Involvement of ethylene in spore germination and mycelial growth of *Alternaria alternata* 118
Structure-activity relationships among isoflavonoids with regard to their antifungal properties 1376

Alternaria zinniae
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107

Alternate hosts
Isolation of *Fusarium* species from common broad-leaved weeds and their pathogenicity to winter wheat 776

Amphisphaeriaceae
Urosporellopsis taiwanensis gen. et sp. nov., a new amphisphaeriaceous ascomycete on *Sassafras* from Taiwan 101

Anaerobic fungi
Anaerobic fungi in herbivorous animals 129
Metabolic energy generation in hydrogenosomes of the anaerobic fungus *Neocallimastix*: evidence for a functional relationship with mitochondria 205

Anaerobic growth
An unusual facultatively anaerobic filamentous fungus isolated under prolonged enrichment culture conditions 757
Anaerobic growth of fungal mycelium from soil particles onto nutrient-free silica gel 761

Anastomosis
Anamorphic and teleomorphic characteristics of a uninucleate *Rhizoctonia* sp. isolated from the roots of nursery grown conifer seedlings 1044

Anastomosis groups
The occurrence and pathogenicity of *Rhizoctonia* fungi in South Australian plant nurseries 77
Characteristics of some *Rhizoctonia* spp. from South Australian plant nurseries 83
Anastomosis group (AG) affinity of pectic isozyme (Zymogram) groups (ZG) of *Rhizoctonia solani* from the Western Australian cereal-belt 1369

Anastrepha striata
Stigmatomyces species on guava fruit flies in seasonal and non-seasonal neotropical forest environments 403

Aniptodera haispora
Observations on mangrove fungi from Macau and Hong Kong, with the description of two new ascomycetes: *Diaporthe salsuginosa* and *Aniptodera haispora* 699

Aniptodera salsuginosa
Aniptodera salsuginosa, a new mangrove-inhabiting ascomycete, with observations on the effect of salinity on ascospore appendage morphology 931

Anixiella sublineata
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora*, *Gelasinospora* and *Anixiella* 1309

Antarctica
Mycorrhizas of hepatics in continental Antarctica 34

Antennospora salina
Ultrastructure of *Antennospora salina* comb. nov. 997

Antifungal activity
Mechanisms of action of the antibiotic flavipin on *Monilinia laxa* and *Saccharomyces cerevisiae* 874
Structure-activity relationships among isoflavonoids with regard to their antifungal properties 1376

Aphanomyces
Pathogenicity, morphology and isozyme variability among isolates of *Aphanomyces* spp. from weeds and various crop plants 231
Loss and recovery of zoospore motility in an isolate of *Aphanomyces* from a diseased fish 1463

Aphanomyces cladogamus
Pathogenicity, morphology and isozyme variability among isolates of *Aphanomyces* spp. from weeds and various crop plants 231

Aphanomyces cochlioides
Pathogenicity, morphology and isozyme variability among isolates of *Aphanomyces* spp. from weeds and various crop plants 231

Aphanomyces euteiches
Pathogenicity, morphology and isozyme variability among isolates of *Aphanomyces* spp. from weeds and various crop plants 231

Apiognomonia errabunda
Colonization of beech leaves (*Fagus sylvatica*) by the endophyte *Discula umbrinella* (teleomorph: *Apiognomonia errabunda*) 423

Aquatic fungi
Pythium fluminum var. *fluminum* from pond water in Osaka 982

Arachnopeziza aurelia
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137

Armillaria
Species delimitation in North American species of *Armillaria* as measured by DNA reassociation 1005

Armillaria cepistipes
Armillaria species identified in China and Japan 607

Armillaria gallica
Armillaria species identified in China and Japan 607
Armillaria mellea
Armillaria species identified in China and Japan 607
Armillaria ostoyae
Armillaria species identified in China and Japan 607
Armillaria sinapina
Armillaria species identified in China and Japan 607
Arthrobotrys oligospora
Transfer of phosphorus from *Rhizoctonia solani* to the mycoparasite *Arthrobotrys oligospora* 1065
Competitive interactions between two nematophagous fungi during infection and digestion of the nematode *Panegrellus redivivus* 1458
Aschersonia
Spore germination in the entomopathogenic genus *Aschersonia* 165
Ascochitine
Variation in the production of ascochitine by *Ascochyta fabae* 1069
Ascochyta fabae
Variation in the production of ascochitine by *Ascochyta fabae* 1069
Ascomycetes
Distribution of zaragozic acids (squalestatins) among filamentous ascomycetes 733
Aspergillus implicatus
Aspergillus implicatus, a new species isolated from Ivory Coast forest soil 869
Aspergillus nidulans
Insertions and G–C rich DNA sequences in the mitochondrial large ribosomal subunit of *Leptosphaeria maculans* 445
Aspergillus oryzae
Development of morphological heterogeneity in glucose- limited chemostat cultures of *Aspergillus oryzae* 95
Aspergillus parasiticus
Possible role of ergosterol oxidation in aflatoxin production by *Aspergillus parasiticus* 363
Isolation and characterization of morphological variants of *Aspergillus parasiticus* deficient in secondary metabolite production 645
Astrosphaeriella aquatica
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719
Atta cephalotes
Leucoagaricus basidiomata from a live nest of the leaf-cutting ant *Atta cephalotes* 884
Attachment
Fungal adhesion 961
The role of hydrophobicity in attachment of urediniospores and sporelings of *Uromyces viciae-fabae* 1217
Auriculoscypha anacardiicola
Patterns of basidiospore germination in *Auriculoscypha anacardiicola* 64
Auriscalpium villipes
Notes on mating systems of *Auriscalpium vulgare* and *A. villipes* 1427
Auriscalpium vulgare
Notes on mating systems of *Auriscalpium vulgare* and *A. villipes* 1427
Axenic culture
Axenic culture of the aecial state of *Cronartium flaccidum* from Italy 1258
Basidiomycetes
Agglutinins (lectins) from some British higher fungi 277
Perenniporia formosana sp. nov. on *Prunus* in Taiwan 954
On the *Hyphoderma praetermissum* complex 1012
Basidiospore germination
Patterns of basidiospore germination in *Auriculoscypha anacardiicola* 64
Basidiospore viability
Basidiospore viability in stored slurries 527
Beauveria bassiana
Comparative analysis of molecular and biological characteristics of strains of *Beauveria brongniartii* isolated from insects 322
Influence of culture age on rate of conidiospore germination in four deuteromycetous entomogenous fungi 763
Beauveria brongniartii
Comparative analysis of molecular and biological characteristics of strains of *Beauveria brongniartii* isolated from insects 322
Betaine
Betaine transport in *Fusarium graminearum* 176

Biocontrol
Use of the RAPD procedure for the identification of *Trichoderma* strains 531
Effects of temperature on the viability of the conidia of *Metarhizium flavoviride* in oil formulations 749
Mechanisms of action of the antibiotic flavipin on *Monilinia laxa* and *Saccharomyces cerevisiae* 874
Biodiversity
Biodiversity of arbuscular mycorrhizal fungi 705
Biological control
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153
Invasion and development of *Verticillium lecanii* in the western flower thrips, *Frankliniella occidentalis* 1025
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107
Evaluation of *Penicillium chrysogenum* and its antifungal extracts as potential biological control agents against *Botrytis fabae* on faba beans 1117
In vitro growth and microcycle conidiation of *Idriella bolleyi*, a biocontrol agent of cereal pathogens 1200
Separation of *Metarhizium anisopliae* strains by temperature dependent germination rates 1253
Variation in pyrone production, lytic enzymes and control of rhizoctonia root rot of wheat among single-spore isolates of *Trichoderma koningii* 1357
Nutritional and biological activities of a sterile red fungus which promotes plant growth and suppresses take-all 1453
Bipolaris sorokiniana
Purification and characterization of a xylanase from *Bipolaris sorokiniana* 67
Botryandromyces heteroceri
Further records of Laboulbeniales from collections of British Coleoptera 433
Botryosphaeriaceae
Sivanesania, a new botryosphaeriaceous ascomycete genus on *Rubus* from Taiwan 44
Botrytis cinerea
Use of the RAPD procedure for the identification of *Trichoderma* strains 531
Sclerotiniaceous species on *Rubus chamaemorus*: morphoanatomical and RFLP studies 923
Botrytis fabae
Evaluation of *Penicillium chrysogenum* and its antifungal extracts as potential biological control agents against *Botrytis fabae* on faba beans 1117
Bridelia stipularis
New species of *Stenella* from India 516
Calamus
Two interesting *Cirsosia* species on *Calamus* from India 127
Calcium
pH and Ca^{2+} dependent galvanotropism of filamentous fungi: implications and mechanisms 301
Calcium oxalate
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Callistemon
The genus *Phyllachora* from Australia: observations on taxa from *Callistemon* species 1393
Cantharellaceae
Length variation in the internal transcribed spacers of ribosomal DNA in chanterelles 614
Cantharellus
Length variation in the internal transcribed spacers of ribosomal DNA in chanterelles 614
Castoreum tasmanicum
Fruiting of hypogeous fungi in dry sclerophyll forest in Tasmania, Australia: seasonal variation and annual production 1173
Cellulase
Production of cellulases and hemicellulases by the straw mushroom *Volvariella volvacea* 1019
Cell-wall composition
Investigation of the value of β-glucan-specific fluorochromes for predicting the β-glucan content of the cell walls of zoopathogenic fungi 694
Cephaloziella exiliflora
Mycorrhizas of hepatics in continental Antarctica 34

Ceratobasidium
Anamorphic and teleomorphic characteristics of a uninucleate *Rhizoctonia* sp. isolated from the roots of nursery grown conifer seedlings 1044
Ceratobasidium cornigerum
Characteristics of some *Rhizoctonia* spp. from South Australian plant nurseries 83
Ceratobasidium pseudocornigerum
Characteristics of some *Rhizoctonia* spp. from South Australian plant nurseries 83
Ceratocystis
The polyphyletic origins of ophiostomatoid fungi 1
Cerato-ulmin
Effect of temperature on growth and cerato-ulmin production of *Ophiostoma novo-ulmi* and *O. ulmi* 408
Cercospora arachidicola
The toxicity of phytotoxins from *Cercospora arachidicola* and cercosporin from *Cercospora* species to tobacco, Swiss chard and groundnut plants 1245
Cercosporin
The toxicity of phytotoxins from *Cercospora arachidicola* and cercosporin from *Cercospora* species to tobacco, Swiss chard and groundnut plants 1245
Cereal eyespot
Cultural variability in the cereal eyespot pathogen *Pseudocercosporella herpotrichoides* 396
Chamaecyparis formosensis
Leptographium elegans: a new species from Taiwan 781
Checklist
Nematode-trapping species of *Monacrosporium* with special reference to two new species 862
CHEF Electrophoresis
Assignment of genes to pulse-field separated chromosomes of *Schizophyllum commune* 689
Chemostat cultures
Development of morphological heterogeneity in glucose- limited chemostat cultures of *Aspergillus oryzae* 95
Chemotaxonomy
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
A chemotaxonomic study of the terverticillate penicillia based on high performance liquid chromatography of secondary metabolites 1317
Chernobyl
Changes in micromycete communities in soil in response to pollution by long-lived radionucleotides emitted in the Chernobyl accident 789
Chloridium virescens
Conidiogenesis in *Phialocephala humicola* 745
Choline
Phosphoinositide turnover does not mediate the effects of light or choline, or the relief of derepression of glucose metabolism in filamentous fungi 291
Chromolaena odorata
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107
Chromosomal DNA
Assignment of genes to pulse-field separated chromosomes of *Schizophyllum commune* 689
Ciboria latipes
Sclerotiniaceous species on *Rubus chamaemorus*: morphoanatomical and RFLP studies 923
Ciliochorella mangiferae
Development of conidiomata in *Ciliochorella mangiferae* 857
Cirsosia arecacearum
Two interesting *Cirsosia* species on *Calamus* from India 127
Cirsosia globulifera
Two interesting *Cirsosia* species on *Calamus* from India 127
Cistella calafiae
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Cladistics
The polyphyletic origins of ophiostomatoid fungi 1
Cladobotryum dendroides
Cellulose-triggered sporulation in the galactose oxidase-producing fungus *Cladobotryum* (*Dactylium*) *dendroides* NRRL 2903 and its reidentification as a species of *Fusarium* 474
Cladosporium cladosporioides
Water relations of *Alternaria alternata*, *Cladosporium cladosporioides*, *Cladosporium sphaerospermum*, *Curvularia lunata* and *Curvularia pallescens* 91
Cladosporium fulvum
Occurrence of a retrotransposon-like sequence among different formae speciales and races of *Fusarium oxysporum* 993
Cladosporium herbarum
Structure-activity relationships among isoflavonoids with regard to their antifungal properties 1376
Cladosporium sphaerospermum
Water relations of *Alternaria alternata*, *Cladosporium cladosporioides*, *Cladosporium sphaerospermum*, *Curvularia lunata* and *Curvularia pallescens* 91
Claviceps purpurea
Studies on function and mobility of mitochondrial plasmids from *Claviceps purpurea* 511
Coleoptera
Further records of Laboulbeniales from collections of British Coleoptera 433
Colletotrichum acutatum
Nucleotide sequence of the rDNA spacer 1 enables identification of isolates of *Colletotrichum* as *C. acutatum* 186
Pathogenicity of *Colletotrichum acutatum* and *C. gloeosporioides* on leaves of *Hevea* spp. 264
Colletotrichum fructigenum
Nucleotide sequence of the rDNA spacer 1 enables identification of isolates of *Colletotrichum* as *C. acutatum* 186
Colletotrichum gloeosporioides
Nucleotide sequence of the rDNA spacer 1 enables identification of isolates of *Colletotrichum* as *C. acutatum* 186
Pathogenicity of *Colletotrichum acutatum* and *C. gloeosporioides* on leaves of *Hevea* spp. 264
Colletotrichum musae
Nucleotide sequence of the rDNA spacer 1 enables identification of isolates of *Colletotrichum* as *C. acutatum* 186
Colony variation
Cultural variability in the cereal eyespot pathogen *Pseudocercosporella herpotrichoides* 396
Colour standards
Colour standards: a review and evaluation in relation to *Penicillium* taxonomy 635
Community structure
Changes in micromycete communities in soil in response to pollution by long-lived radionucleotides emitted in the Chernobyl accident 789
Analysis of micromycete communities in soil: a critique of methods 796
Concanavalin A
Enhanced labelling of concanavalin A binding sites in fungal endomembranes using a double-sided, indirect method 769
Conidial formation
In vitro growth and microcycle conidiation of *Idriella bolleyi*, a biocontrol agent of cereal pathogens 1200
Conidial germination
Effect of osmotic potential on the germination of conidia and colony growth of *Verticillium lecanii* 384
Influence of culture age on rate of conidiospore germination in four deuteromycetous entomogenous fungi 763
Separation of *Metarhizium anisopliae* strains by temperature dependent germination rates 1253
Conidial survival
Effects of temperature on the viability of the conidia of *Metarhizium flavoviride* in oil formulations 749
Conidiogenesis
Conidiogenesis in *Phialocephala humicola* 745
Notes on two *Tripospermum* species: *T. pes-gallinae* and *T. variabile* 879
Graphium pseudormiticum sp. nov.: a new hyphomycete with unusual conidiogenesis 1272
Coniophora puteana
Growth of *Coniophora puteana* modified by a gall-inducing mycoparasite 1263
Coprinus bilanatus
Cloning the *Coprinus bilanatus TRP2* gene and its use as a selectable marker in transformation 179
Coprinus cinereus
Cloning the *Coprinus bilanatus TRP2* gene and its use as a selectable marker in transformation 179
Coprophilous fungi
A new hairy species of *Sporormiella* 10
Sporocarpic Endogonales and Glomales in the scats of *Rattus* and *Perameles* 246

Cordyceps khaoyaiensis
Cordyceps khaoyaiensis and *C. pseudomilitaris*, two new pathogens of lepidopteran larvae from Thailand 939
Cordyceps pseudomilitaris
Cordyceps khaoyaiensis and *C. pseudomilitaris*, two new pathogens of lepidopteran larvae from Thailand 939
Corticiaceae
On the *Hyphoderma praetermissum* complex 1012
Cortinarius horakii
Cortinarius horakii, a new species from Chile 937
Craterellus
Length variation in the internal transcribed spacers of ribosomal DNA in chanterelles 614
Crepidotus applanatus
Stephanocysts in *Crepidotus applanatus* 419
Crocicreas pilifera
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Crocicreas sulphurea
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Cronartium flaccidum
Axenic culture of the aecial state of *Cronartium flaccidum* from Italy 1258
Cryopreservation
Cryopreservation of fungal spores using porous beads 525
Basidiospore viability in stored slurries 527
Cryptococcus neoformans
Investigation of the value of β-glucan-specific fluorochromes for predicting the β-glucan content of the cell walls of zoopathogenic fungi 694
Cryptophiale manifesta
Cryptophialoidea fasciculata sp. nov. and *C. manifesta* comb. nov. from Malaysia 686
Cryptophialoidea fasciculata
Cryptophialoidea fasciculata sp. nov. and *C. manifesta* comb. nov. from Malaysia 686
Cryptophialoidea manifesta
Cryptophialoidea fasciculata sp. nov. and *C. manifesta* comb. nov. from Malaysia 686
Cucurbita
Genetic analysis of variation of pathogenicity in *Nectria haematococca* (*Fusarium solani*) on *Cucurbita* 1183
Curvularia lunata
Water relations of *Alternaria alternata*, *Cladosporium cladosporioides*, *Cladosporium sphaerospermum*, *Curvularia lunata* and *Curvularia pallescens* 91
Curvularia pallescens
Water relations of *Alternaria alternata*, *Cladosporium cladosporioides*, *Cladosporium sphaerospermum*, *Curvularia lunata* and *Curvularia pallescens* 91
Cystopezizella conorum
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Cytisus scoparius
Gibberella tumida sp. nov. – teleomorph of *Fusarium tumidum* from gorse in New Zealand 729
Dactylella megalobrocha
Dactylella megalobrocha, a new species of nematophagous fungus with constricting rings 845
Dactylium dendroides
Cellulose-triggered sporulation in the galactose oxidase-producing fungus *Cladobotryum* (*Dactylium*) *dendroides* NRRL 2903 and its reidentification as a species of *Fusarium* 474
Dalbergia miscolobium
Mimema venturae sp. nov. on *Dalbergia miscolobium* in Brazil 786
Dendrobium kingianum
Involvement of exodermal passage cells in mycorrhizal infection of some orchids 672
Derris scandens
New synnematous foliicolous hyphomycetes from India 521
Development
Involvement of ethylene in spore germination and mycelial growth of *Alternaria alternata* 118
Mechanical properties of the mushroom, *Agaricus bisporus* 241
Occlusion of septal pores in filamentous fungi 1089
Dianthus strictus
Vegetative compatibility in populations of *Fusarium oxysporum* from wild carnations 1415
Diaporthe salsuginosa
Observations on mangrove fungi from Macau and Hong Kong, with the description of two new ascomycetes: *Diaporthe salsuginosa* and *Aniptodera haispora* 699
Diaporthe toxica
Diaporthe toxica sp. nov., the cause of lupinosis in sheep 1364
Diaporthe woodii
Diaporthe toxica sp. nov., the cause of lupinosis in sheep 1364
Differentiation
The role of the plasma membrane in differentiation of *Phytophthora palmivora* zoospores 1051
Dimeromyces balazucii
Further records of Laboulbeniales from collections of British Coleoptera 433
Discula umbrinella
Colonization of beech leaves (*Fagus sylvatica*) by the endophyte *Discula umbrinella* (teleomorph: *Apiognomonia errabunda*) 423
Dispersal
Splash dispersal of conidia of *Fusarium culmorum* and *Fusarium avenaceum* 506
DNA
Occurrence of a retrotransposon-like sequence among different formae speciales and races of *Fusarium oxysporum* 993
Comparative studies on *Phytophthora megasperma* isolates from chickpea collected in Australia and Spain 1284
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora*, *Gelasinospora* and *Anixiella* 1309
DNA hybridization
Species delimitation in North American species of *Armillaria* as measured by DNA reassociation 1005
Genetic relationships in *Pseudocercosporella herpotrichoides* determined from DNA relatedness 1059
Dolichos
New species of *Stenella* from India 516
Dolichos biflorus
New synnematous foliicolous hyphomycetes from India 521
Drechmeria coniospora
Competitive interactions between two nematophagous fungi during infection and digestion of the nematode *Panagrellus redivivus* 1458
Echinotrema clanculare
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Ecteinomyces trichopterophilus
Further records of Laboulbeniales from collections of British Coleoptera 433
Ectomycorrhizal fungi
Typing truffle species by PCR amplification of the ribosomal DNA spacers 37
Fruiting of hypogeous fungi in dry sclerophyll forest in Tasmania, Australia: seasonal variation and annual production 1173
Ectomycorrhizas
Fungal enzymes degrading plant cell walls: their possible significance in the ectomycorrhizal symbiosis 1345
ELISA
A monoclonal antibody for the detection of *Serpula lachrymans* 356
Immuno-enzymatic staining procedure for *Pythium* species with filamentous non-inflated sporangia in soilless cultures 535
Endogonales
Sporocarpic Endogonales and Glomales in the scats of *Rattus* and *Perameles* 246
Endomycorrhizal fungi
Stability and heritability of fatty acid methyl ester profiles of glomalean endomycorrhizal fungi 1419
Endophytes
Isozyme relationships of *Acremonium* endophytes from twelve *Festuca* species 25
Colonization of beech leaves (*Fagus sylvatica*) by the endophyte *Discula umbrinella* (teleomorph: *Apiognomonia errabunda*) 423
Genetic diversity among natural populations of endophytic *Lophodermium pinastri* from *Pinus resinosa* 740
First record of intracellular sporulation by a coelomycete fungus 1390
Entomogenous fungi
Spore germination in the entomopathogenic genus *Aschersonia* 165
Comparative analysis of molecular and biological characteristics of strains of *Beauveria brongniartii* isolated from insects 322
Stigmatomyces species on guava fruit flies in seasonal and non-seasonal neotropical forest environments 403

Effects of temperature on the viability of the conidia of *Metarhizium flavoviride* in oil formulations 749
Influence of culture age on rate of conidiospore germination in four deuteromycetous entomogenous fungi 763
Cordyceps khaoyaiensis and *C. pseudomilitaris*, two new pathogens of lepidopteran larvae from Thailand 939
Invasion and development of *Verticillium lecanii* in the western flower thrips, *Frankliniella occidentalis* 1025
Characterization of isolates of the entomopathogenic fungus *Metarhizium anisopliae* by RAPD-PCR 1077
Separation of *Metarhizium anisopliae* strains by temperature dependent germination rates 1253
New species and records of *Eucantharomyces*, with remarks on their perithecial apex 1303
Mutants of entomopathogenic fungi that germinate and grow at reduced water activities and reduced relative humidities are more virulent to *Nepotettix virescens* (green leafhopper) than the parental strains 1329

Entomophaga bukidnonensis
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153

Entomophthora philippinensis
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153

Entomophthorales
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153

Entorrhiza

Fungal enzymes degrading plant cell walls: their possible significance in the ectomycorrhizal symbiosis 1345

Epicoccum nigrum
Mechanisms of action of the antibiotic flavipin on *Monilinia laxa* and *Saccharomyces cerevisiae* 874

Epidendrum radicans
Involvement of exodermal passage cells in mycorrhizal infection of some orchids 672

Ergosterol
Possible role of ergosterol oxidation in aflatoxin production by *Aspergillus parasiticus* 363

Erynia triangularis
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153

Ethyl hexanoate
Production of fruity aroma by *Neurospora* from beiju 1300

Ethylene
Involvement of ethylene in spore germination and mycelial growth of *Alternaria alternata* 118

Eucalyptus
Further *Mycosphaerella* species associated with leaf diseases of *Eucalyptus* 413

Eucalyptus tenuiramus
Fruiting of hypogeous fungi in dry sclerophyll forest in Tasmania, Australia: seasonal variation and annual production 1173

Eucantharomyces introflexus
New species and records of *Eucantharomyces*, with remarks on their perithecial apex 1303

Eucantharomyces singilidis
New species and records of *Eucantharomyces*, with remarks on their perithecial apex 1303

Eucantharomyces spinosus
New species and records of *Eucantharomyces*, with remarks on their perithecial apex 1303

Eupenicillium
Independent origins of the synnematous *Penicillium* species, *P. duclauxii*, *P. clavigerum*, and *P. vulpinum*, as assessed by two ribosomal DNA regions 250

Eurychasmopsis multisecunda
Eurychasmopsis multisecunda gen. et sp. nov., a parasite of the suctorian ciliate *Podophrya* 105

Exserticlava trisepta
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677

Exserticlava vasiformis
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677

Fagus sylvatica
Colonization of beech leaves (*Fagus sylvatica*) by the endophyte *Discula umbrinella* (teleomorph: *Apiognomonia errabunda*) 423

Fatty acid profiles
Combining sterol and fatty acid profiles for the characterization of fungi 593
Stability and heritability of fatty acid methyl ester profiles of glomalean endomycorrhizal fungi 1419

Fish pathogens
Loss and recovery of zoospore motility in an isolate of *Aphanomyces* from a diseased fish 1463

Flavipin
Mechanisms of action of the antibiotic flavipin on *Monilinia laxa* and *Saccharomyces cerevisiae* 874

Fluorescent staining
Presence of a motile tubular vacuole system in different phyla of fungi 985

Fluviatispora
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719

Fluviatispora reticulata
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719

Fluviatispora tunicata
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719

Frankliniella occidentalis
Invasion and development of *Verticillium lecanii* in the western flower thrips, *Frankliniella occidentalis* 1025

Fungal attachment
Fungal adhesion 961

Fungal flora
Contamination of different muesli components by fungi 583

Fungicides
A microscopic evaluation of the sensitivity of *Venturia inaequalis* populations to sterol demethylation inhibitors 619

Fusarium
Cellulose-triggered sporulation in the galactose oxidase-producing fungus *Cladobotryum* (*Dactylium*) *dendroides* NRRL 2903 and its reidentification as a species of *Fusarium* 474
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625

Fusarium anthophilum
Fungi associated with infructescences of *Protea* species in South Africa, including a new species of *Ophiostoma* 369

Fusarium avenaceum
Splash dispersal of conidia of *Fusarium culmorum* and *Fusarium avenaceum* 506
Isolation of *Fusarium* species from common broad-leaved weeds and their pathogenicity to winter wheat 776

Fusarium culmorum
Splash dispersal of conidia of *Fusarium culmorum* and *Fusarium avenaceum* 506
Isolation of *Fusarium* species from common broad-leaved weeds and their pathogenicity to winter wheat 776

Fusarium graminearum
Betaine transport in *Fusarium graminearum* 176
Phosphoinositide turnover does not mediate the effects of light or choline, or the relief of derepression of glucose metabolism in filamentous fungi 291
Isolation of *Fusarium* species from common broad-leaved weeds and their pathogenicity to winter wheat 776

Fusarium oxysporum
Occurrence of a retrotransposon-like sequence among different formae speciales and races of *Fusarium oxysporum* 993
In vitro activity of 6-pentyl-a-pyrone, a metabolite of *Trichoderma harzianum*, in the inhibition of *Rhizoctonia solani* and *Fusarium oxysporum* f. sp. *lycopersici* 1207
Structure-activity relationships among isoflavonoids with regard to their antifungal properties 1376
Vegetative compatibility in populations of *Fusarium oxysporum* from wild carnations 1415

Fusarium pallidoroseum
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107
Fusarium poae
Isolation of *Fusarium* species from common broad-leaved weeds and their pathogenicity to winter wheat 776
Fusarium sambucinum
Isolation of *Fusarium* species from common broad-leaved weeds and their pathogenicity to winter wheat 776
Fusarium solani
An unusual facultatively anaerobic filamentous fungus isolated under prolonged enrichment culture conditions 757
Anaerobic growth of fungal mycelium from soil particles onto nutrient-free silica gel 761
Genetic analysis of variation of pathogenicity in *Nectria haematococca* (*Fusarium solani*) on *Cucurbita* 1183
Fusarium tumidum
Gibberella tumida sp. nov. – teleomorph of *Fusarium tumidum* from gorse in New Zealand 729
Gaeumannomyces graminis
Identification of fungi in the *Gaeumannomyces–Phialophthora* complex by RFLPs of PCR-amplified ribosomal DNAs 219
Characterization of nuclear ribosomal DNA (rDNA) in *Gaeumannomyces graminis* and correlation of rDNA variation with *G. graminis* varieties 553
Nutritional and biological activities of a sterile red fungus which promotes plant growth and suppresses take-all 1453
Galls
Growth of *Coniophora puteana* modified by a gall-inducing mycoparasite 1263
Galvanotropism
pH and Ca^{2+} dependent galvanotropism of filamentous fungi: implications and mechanisms 301
Gelasinospora calospora
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora, Gelasinospora* and *Anixiella* 1309
Gelasinospora reticulospora
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora, Gelasinospora* and *Anixiella* 1309
Genotypic variation
Intraspecific genetic variation in *Heterobasidion annosum* revealed by amplification of minisatellite DNA 57
Genetic diversity among natural populations of endophytic *Lophodermium pinastri* from *Pinus resinosa* 740
Gibberella tumida
Gibberella tumida sp. nov. – teleomorph of *Fusarium tumidum* from gorse in New Zealand 729
Gigaspora gigantea
Gigaspora gigantea: seasonal abundance and ageing of spores in a sand dune 453
Gigaspora gigantea: parasitism of spores by fungi and actinomycetes 458
Gigaspora rosea
Stability and heritability of fatty acid methyl ester profiles of glomalean endomycorrhizal fungi 1419
Gliocladium
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Glomales
Sporocarpic Endogonales and Glomales in the scats of *Rattus* and *Perameles* 246
Stability and heritability of fatty acid methyl ester profiles of glomalean endomycorrhizal fungi 1419
Glomus claroideum
Stability and heritability of fatty acid methyl ester profiles of glomalean endomycorrhizal fungi 1419
Glomus etunicatum
Stability and heritability of fatty acid methyl ester profiles of glomalean endomycorrhizal fungi 1419
Glomus geosporum
Ultrastructural observations and a computer model of the helicoidal appearance of the spore wall of *Glomus geosporum* 307
Glucans
Investigation of the value of β-glucan-specific fluorochromes for predicting the β-glucan content of the cell walls of zoopathogenic fungi 694
Glucose
Phosphoinositide turnover does not mediate the effects of light or choline, or the relief of derepression of glucose metabolism in filamentous fungi 291
Glycoprotein binding sites
Specific binding sites for human luteinizing hormone in *Neurospora crassa* and *Saccharomyces cerevisiae* 1229
Glycoproteins
Specific binding sites for human luteinizing hormone in *Neurospora crassa* and *Saccharomyces cerevisiae* 1229
Graddonidiscus hispanicus
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Graphium pseudormiticum
Graphium pseudormiticum sp. nov.: a new hyphomycete with unusual conidiogenesis 1272
Grevillea
The genus *Phyllachora* from Australia: two new taxa, *P. velatispora* var. *velatispora* and *P. velatispora* var. *hilliannae*, on *Grevillea* and notes on *P. grevilleae* 1402
Growth
Water relations of *Alternaria alternata, Cladosporium cladosporioides, Cladosporium sphaerospermum, Curvularia lunata* and *Curvularia pallescens* 91
Effect of osmotic potential on the germination of conidia and colony growth of *Verticillium lecanii* 384
Effect of temperature on growth and cerato-ulmin production of *Ophiostoma novo-ulmi* and *O. ulmi* 408
Halosphaeria Salina
Ultrastructure of *Antennospora salina* comb. nov. 997
Harposporium microsporum
A new species of *Harposporium* infecting *Rhabditis* nematodes with microspores 854
Helicoon macrosporum
A new species of *Helicoon* 74
Helicoon richonis
A new species of *Helicoon* 74
Helicoubisia coronata
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677
Heliocybe
Neolentinus – a well-founded genus in the Pleuroteaceae that includes *Heliocybe* 542
Hemicellulase
Production of cellulases and hemicellulases by the straw mushroom *Volvariella volvacea* 1019
Heniocospora longissima
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677
Heterobasidion annosum
Intraspecific genetic variation in *Heterobasidion annosum* revealed by amplification of minisatellite DNA 57
Heteropsylla cubana
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153
Hevea
Pathogenicity of *Colletotrichum acutatum* and *C. gloeosporioides* on leaves of *Hevea* spp. 264
Hirsutella rhossiliensis
Variability among isolates of the nematophagous fungus *Hirsutella rhossiliensis* 1127
Hoplochelus marginalis
Comparative analysis of molecular and biological characteristics of strains of *Beauveria brongniartii* isolated from insects 322
Hyalinia flagellispora
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Hyaloscypha aureliella
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Hybridisation
Interspecific hybridisation between *Pseudocercosporella herpotrichoides* and *P. anguioides* achieved through protoplast fusion 47
Hydraeomyces halipli
Further records of Laboulbeniales from collections of British Coleoptera 433
Hydrogenosomes
Metabolic energy generation in hydrogenosomes of the anaerobic fungus *Neocallimastix*: evidence for a functional relationship with mitochondria 205

Hymenogaster
Fruiting of hypogeous fungi in dry sclerophyll forest in Tasmania, Australia: seasonal variation and annual production 1173
Hyphal structure
Light and electron microscopy of *Ustilago maydis* hyphae in maize 347
Hyphoderma praetermissum
On the *Hyphoderma praetermissum* complex 1012
Hypocrea
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Hypocreales
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Hypocrella
Spore germination in the entomopathogenic genus *Aschersonia* 165
Hypogeal fungi
Fruiting of hypogeous fungi in dry sclerophyll forest in Tasmania, Australia: seasonal variation and annual production 1173
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334
Hypomyces
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Hysterangium
Fruiting of hypogeous fungi in dry sclerophyll forest in Tasmania, Australia: seasonal variation and annual production 1173
Idiomyces peyritschii
Further records of Laboulbeniales from collections of British Coleoptera 433
Idriella bolleyi
In vitro growth and microcycle conidiation of *Idriella bolleyi*, a biocontrol agent of cereal pathogens 1200
Incrupila calcea
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Incrupila isabellina
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Ion transport
Patch clamping fungal membranes: a new perspective on ion transport 257
Isoenzyme analysis
Isozyme relationships of *Acremonium* endophytes from twelve *Festuca* species 25
Rhodocybe stangliana, a parasite on other agarics? 88
Evidence for distinct isozyme subgroups within *Phytophthora citricola* and close relationships with *P. capsici* and *P. citrophthora* 189
Phylogenetic relationships within the genus *Metarhizium* based on 28S rRNA sequences and isozyme comparison 225
Pathogenicity, morphology and isozyme variability among isolates of *Aphanomyces* spp. from weeds and various crop plants 231
Variability for isozyme, vegetative compatibility and RAPD markers in natural populations of *Phomopsis subordinaria* 267
Genetic variability and systematics of eleven *Pleurotus* species based on isozyme analysis 329
Enzymic studies as an aid to the taxonomy of the *Lyophyllum decastes* complex 375
Biodiversity of arbuscular mycorrhizal fungi 705
Isozyme diversity in *Phytophthora palmivora*: evidence for a southeast Asian centre of origin 1035
An integrated study of morphological and isozyme patterns found within a worldwide collection of *Phytophthora citrophthora* and a redescription of the species 1291
Anastomosis group (AG) affinity of pectic isozyme (Zymogram) groups (ZG) of *Rhizoctonia solani* from the Western Australian cereal-belt 1369
Phytophthora isolates from coconut plantations in Indonesia and Ivory Coast: characterization and identification by morphology and isozyme analysis 1379
Isoflavonoids
Structure-activity relationships among isoflavonoids with regard to their antifungal properties 1376
Keys
Observations on mangrove fungi from Macau and Hong Kong, with the description of two new ascomycetes: *Diaporthe salsuginosa* and *Aniptodera haispora* 699
Conidiogenesis in *Phialocephala humicola* 745
Nematode-trapping species of *Monacrosporium* with special reference to two new species 862
A monograph of *Sphaerophragmium* (Uredinales) 907
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
The genus *Phyllachora* from Australia: two new taxa, *P. velatispora* var. *velatispora* and *P. velatispora* var. *hilliannae*, on *Grevillea* and notes on *P. grevilleae* 1402
Globose and ellipsoid-spored *Tulasnella* species from Devon and Surrey, with a key to the genus in Europe 1431
Kostermansinda magna
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Parauloclad ium fabisporum* sp. nov. and other hyphomycetes from Malaya 677
Kunzea ericifolia
Puccinia cygnorum sp. nov. on *Kunzea ericifolia* in Australia 22
Laboulbenia acupalpi
Further records of Laboulbeniales from collections of British Coleoptera 433
Laboulbenia leisti
Further records of Laboulbeniales from collections of British Coleoptera 433
Laboulbenia notiophili
Further records of Laboulbeniales from collections of British Coleoptera 433
Laboulbenia pseudomasei
Further records of Laboulbeniales from collections of British Coleoptera 433
Laboulbenia thaxteri
Further records of Laboulbeniales from collections of British Coleoptera 433
Laboulbeniales
Stigmatomyces species on guava fruit flies in seasonal and non-seasonal neotropical forest environments 403
Further records of Laboulbeniales from collections of British Coleoptera 433
New species and records of *Eucantharomyces*, with remarks on their perithecial apex 1303
Laccaria bicolor
Spatial distribution of *Laccaria bicolor* genets reflected by sporocarps after removal of litter and humus layers in a *Pinus sylvestris* forest 726
Lachnum glutinosum
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Lachnum virgineum
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Lambertella palmeri
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Leaf cutting ants
Leucoagaricus basidiomata from a live nest of the leaf-cutting ant *Atta cephalotes* 884
Leaf spot disease
New *Oxydothis* species associated with palm leaf spots in north Queensland, Australia 213
A new species of *Phloeospora* causing leaf spot on *Trichilia connaroides* 1192
The toxicity of phytotoxins from *Cercospora arachidicola* and cercosporin from *Cercospora* species to tobacco, Swiss chard and groundnut plants 1245
Leaf spot fungi
New species of *Pseudocercospora* and *Stenella* from India 1277
Lectins
Agglutinins (lectins) from some British higher fungi 277
Lentinula edodes
Mitochondrial DNA restriction fragment length polymorphisms in natural populations of *Lentinula edodes* 169
Lentinus sulcatus
Neolentinus – a well-founded genus in the Pleuroteaceae that includes *Heliocybe* 542
Leotiales
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334

Leptographium elegans
Leptographium elegans: a new species from Taiwan 781
Leptosphaeria maculans
Insertions and G–C rich DNA sequences in the mitochondrial large ribosomal subunit of *Leptosphaeria maculans* 445
Leucaena leucocephala
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153
Leucoagaricus gongylophorus
Leucoagaricus basidiomata from a live nest of the leaf-cutting ant *Atta cephalotes* 884
Lichenicolous fungi
Minutoexipula tuckerae gen. et sp. nov., a new lichenicolous deuteromycete on *Pertusaria texana* in the United States 587
Licuala ramsayi
New *Oxydothis* species associated with palm leaf spots in north Queensland, Australia 213
Light
Phosphoinositide turnover does not mediate the effects of light or choline, or the relief of derepression of glucose metabolism in filamentous fungi 291
Lipoperoxides
Possible role of ergosterol oxidation in aflatoxin production by *Aspergillus parasiticus* 363
Litter fungi
Paracryptophiale kamaruddinii gen. et sp. nov. from submerged litter in Malaysia 125
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677
Cryptophialoidea fasciculata sp. nov. and *C. manifesta* comb. nov. from Malaysia 686
Livistona
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719
Lophodermium pinastri
Genetic diversity among natural populations of endophytic *Lophodermium pinastri* from *Pinus resinosa* 740
Lupinosis
Diaporthe toxica sp. nov., the cause of lupinosis in sheep 1364
Lycoperdaceae
Lycoperdopsis, a genus belonging to Lycoperdaceae 904
Lycoperdopsis arcyrioides
Lycoperdopsis, a genus belonging to Lycoperdaceae 904
Lyophyllum decastes
Enzymic studies as an aid to the taxonomy of the *Lyophyllum decastes* complex 375
Magnaporthe grisea
Enhanced labelling of concanavalin A binding sites in fungal endomembranes using a double-sided, indirect method 769
Mangrove fungi
Observations on mangrove fungi from Macau and Hong Kong, with the description of two new ascomycetes: *Diaporthe salsuginosa* and *Aniptodera haispora* 699
Aniptodera salsuginosa, a new mangrove-inhabiting ascomycete, with observations on the effect of salinity on ascospore appendage morphology 931
Mansonone
A glycoprotein isolated from culture filtrates of *Ophiostoma ulmi* as a manosome-inducing elicitor on elm callus 295
Marasmius
Mating systems in *Marasmius*: additional evidence to support sectional consistency 200
Massarina fronsisubmersa
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719
Mating reactions
Mating systems in *Marasmius*: additional evidence to support sectional consistency 200
An integrated study of morphological and isozyme patterns found within a worldwide collection of *Phytophthora citrophthora* and a redescription of the species 1291
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora*, *Gelasinospora* and *Anixiella* 1309
Notes on mating systems of *Auriscalpium vulgare* and *A. villipes* 1427
Mating-type genes
Assignment of genes to pulse-field separated chromosomes of *Schizophyllum commune* 689
Melampsora larici-populina
Comparative studies of the poplar rusts *Melampsora medusae*, *M. larici-populina* and their interspecific hybrid *M. medusae-populina* 889
Melampsora medusae
Comparative studies of the poplar rusts *Melampsora medusae*, *M. larici-populina* and their interspecific hybrid *M. medusae-populina* 889
Melampsora medusae-populina
Comparative studies of the poplar rusts *Melampsora medusae*, *M. larici-populina* and their interspecific hybrid *M. medusae-populina* 889
Membranes
Patch clamping fungal membranes: a new perspective on ion transport 257
Metarhizium
Phylogenetic relationships within the genus *Metarhizium* based on 28S rRNA sequences and isozyme comparison 225
Metarhizium album
Phylogeny of *Metarhizium*: analysis of ribosomal DNA sequence data 547
Metarhizium anisopliae
Phylogenetic relationships within the genus *Metarhizium* based on 28S rRNA sequences and isozyme comparison 225
Phylogeny of *Metarhizium*: analysis of ribosomal DNA sequence data 547
Influence of culture age on rate of conidiospore germination in four deuteromycetous entomogenous fungi 763
Characterization of isolates of the entomopathogenic fungus *Metarhizium anisopliae* by RAPD-PCR 1077
Separation of *Metarhizium anisopliae* strains by temperature dependent germination rates 1253
Mutants of entomopathogenic fungi that germinate and grow at reduced water activities and reduced relative humidities are more virulent to *Nepotettix virescens* (green leafhopper) than the parental strains 1329
Metarhizium flavoviride
Phylogenetic relationships within the genus *Metarhizium* based on 28S rRNA sequences and isozyme comparison 225
Phylogeny of *Metarhizium*: analysis of ribosomal DNA sequence data 547
Effects of temperature on the viability of the conidia of *Metarhizium flavoviride* in oil formulations 749
Mimema venturae
Mimema venturae sp. nov. on *Dalbergia miscolobium* in Brazil 786
Minutoexipula tuckerae
Minutoexipula tuckerae gen. et sp. nov., a new lichenicolous deuteromycete on *Pertusaria texana* in the United States 587
Misgomyces dyschirii
Further records of Laboulbeniales from collections of British Coleoptera 433
Mitochondrial DNA
Mitochondrial DNA restriction fragment length polymorphisms in natural populations of *Lentinula edodes* 169
Evidence for distinct isozyme subgroups within *Phytophthora citricola* and close relationships with *P. capsici* and *P. citrophthora* 189
Insertions and G–C rich DNA sequences in the mitochondrial large ribosomal subunit of *Leptosphaeria maculans* 445
Intraspecific polymorphism of *Phytophthora parasitica* revealed by analysis of mitochondrial DNA restriction fragment length polymorphism 562
Inheritance of mitochondrial DNA in *Phytophthora infestans* 569
Mitochondrial plasmids
Studies on function and mobility of mitochondrial plasmids from *Claviceps purpurea* 511
Mitochondrial r-DNA
Sclerotiniaceous species on *Rubus chamaemorus*: morphoanatomical and RFLP studies 923
Monacrosporium chiuanum
Nematode-trapping species of *Monacrosporium* with special reference to two new species 862
Monacrosporium sinense
Nematode-trapping species of *Monacrosporium* with special reference to two new species 862
Monilinia laxa
Mechanisms of action of the antibiotic flavipin on *Monilinia laxa* and *Saccharomyces cerevisiae* 874
Monoclonal antibody
A monoclonal antibody for the detection of *Serpula lachrymans* 356
Monoicomyces fragilis
Further records of Laboulbeniales from collections of British Coleoptera 433

Morchella esculenta
The role of source-sink relationships in translocation during sclerotial formation by *Morchella esculenta* 1409
Morphology
Development of morphological heterogeneity in glucose- limited chemostat cultures of *Aspergillus oryzae* 95
Phytophthora isolates from coconut plantations in Indonesia and Ivory Coast: characterization and identification by morphology and isozyme analysis 1379
Moserella
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334
Moserella radicicola
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334
Mucor piriformis
Effects of soil moisture, temperature and nutrient availability on the population dynamics of *Mucor piriformis* 342
Muesli
Contamination of different muesli components by fungi 583
Mutants
Induction and genetic characterization of ultraviolet-sensitive mutants in the elm tree pathogen *Ophiostoma ulmi* (*sensu lato*) 943
Mycelial growth
Involvement of ethylene in spore germination and mycelial growth of *Alternaria alternata* 118
Mycoparasites
Gigaspora gigantea: parasitism of spores by fungi and actinomycetes 458
Stachybotrys elegans: a destructive mycoparasite of Rhizoctonia solani 493
Transfer of phosphorus from *Rhizoctonia solani* to the mycoparasite *Arthrobotrys oligospora* 1065
Growth of *Coniophora puteana* modified by a gall-inducing mycoparasite 1263
Mycorrhizal fungi
Rhodocybe stangliana, a parasite on other agarics? 80
Mycorrhizas of hepatics in continental Antarctica 34
Gigaspora gigantea: seasonal abundance and ageing of spores in a sand dune 453
Gigaspora gigantea: parasitism of spores by fungi and actinomycetes 458
Basidiospore viability in stored slurries 527
Involvement of exodermal passage cells in mycorrhizal infection of some orchids 672
Biodiversity of arbuscular mycorrhizal fungi 705
Spatial distribution of *Laccaria bicolor* genets reflected by sporocarps after removal of litter and humus layers in a *Pinus sylvestris* forest 726
Cortinarius horakii, a new species from Chile 937
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334
Mycosphaerella aggregata
Further *Mycosphaerella* species associated with leaf diseases of *Eucalyptus* 413
Mycosphaerella grandis
Further *Mycosphaerella* species associated with leaf diseases of *Eucalyptus* 413
Mycosphaerella marksii
Further *Mycosphaerella* species associated with leaf diseases of *Eucalyptus* 413
Mycotoxins
Isolation and characterization of morphological variants of *Aspergillus parasiticus* deficient in secondary metabolite production 645
Mycovellosiella perfoliata
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107
Nectria
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Nectria haematococca
Genetic analysis of variation of pathogenicity in *Nectria haematococca* (*Fusarium solani*) on *Cucurbita* 1183
Nectriopsis
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Nematode fungi
Dactylella megalobrocha, a new species of nematophagous fungus with constricting rings 845
A new species of *Harposporium* infecting *Rhabditis* nematodes with microspores 854
Nematode-trapping species of *Monacrosporium* with special reference to two new species 862
Variability among isolates of the nematophagous fungus *Hirsutella rhossiliensis* 1127
Competitive interactions between two nematophagous fungi during infection and digestion of the nematode *Panagrellus redivivus* 1458
Neocallimastix
Metabolic energy generation in hydrogenosomes of the anaerobic fungus *Neocallimastix*: evidence for a functional relationship with mitochondria 205
Neodasyscyphus cerinus
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Neolentinus sulcatus
Neolentinus – a well-founded genus in the Pleuroteaceae that includes *Heliocybe* 542
Neozygites heteropsyllae
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153
Nephotettix virescens
Mutants of entomopathogenic fungi that germinate and grow at reduced water activities and reduced relative humidities are more virulent to *Nepotettix virescens* (green leafhopper) than the parental strains 1329
Neurospora crassa
Phosphoinositide turnover does not mediate the effects of light or choline, or the relief of derepression of glucose metabolism in filamentous fungi 291
Insertions and G–C rich DNA sequences in the mitochondrial large ribosomal subunit of *Leptosphaeria maculans* 445
Specific binding sites for human luteinizing hormone in *Neurospora crassa* and *Saccharomyces cerevisiae* 1229
Production of fruity aroma by *Neurospora* from beiju 1300
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora*, *Gelasinospora* and *Anixiella* 1309
Neurospora intermedia
Production of fruity aroma by *Neurospora* from beiju 1300
Neurospora sitophila
Production of fruity aroma by *Neurospora* from beiju 1300
Neurospora terricola
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora*, *Gelasinospora* and *Anixiella* 1309
Neurospora tetrasperma
Production of fruity aroma by *Neurospora* from beiju 1300
New combinations
Neolentinus – a well-founded genus in the Pleuroteaceae that includes *Heliocybe* 542
Cryptophialoidea fasciculata sp. nov. and *C. manifesta* comb. nov. from Malaysia 686
A monograph of *Sphaerophragmium* (Uredinales) 907
Ultrastructure of *Antennospora salina* comb. nov. 997
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
New genera
Sivanesania, a new botryosphaeriaceous ascomycete genus on *Rubus* from Taiwan 44
Urosporellopsis taiwanensis gen. et sp. nov., a new amphisphaeriaceous ascomycete on *Sassafras* from Taiwan 101
Eurychasmopsis multisecunda gen. et sp. nov., a parasite of the suctorian ciliate *Podophrya* 105
Paracryptophiale kamaruddinii gen. et sp. nov. from submerged litter in Malaysia 125
Minutoexipula tuckerae gen. et sp. nov., a new lichenicolous deuteromycete on *Pertusaria texana* in the United States 587
Ticogloea, a new genus of hyphomycetes from roots of *Ticodendron incognitum* from Costa Rica 660
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334
New species
A new hairy species of *Sporormiella* 10
Puccinia cygnorum sp. nov. on *Kunzea ericifolia* in Australia 22
Sivanesania, a new botryosphaeriaceous ascomycete genus on *Rubus* from Taiwan 44
A new species of *Helicoon* 74
Urosporellopsis taiwanensis gen. et sp. nov., a new amphisphaeriaceous ascomycete on *Sassafras* from Taiwan 101

Eurychasmopsis multisecunda gen. et sp. nov., a parasite of the suctorian ciliate *Podophrya* 105
Paracryptophiale kamaruddinii gen. et sp. nov. from submerged litter in Malaysia 125
Two interesting *Cirsosia* species on *Calamus* from India 127
Four new species of Entomophthorales infecting the leucaena psyllid *Heteropsylla cubana* in the Philippines 153
New *Oxydothis* species associated with palm leaf spots in north Queensland, Australia 213
Fungi associated with infructescences of *Protea* species in South Africa, including a new species of *Ophiostoma* 369
Further *Mycosphaerella* species associated with leaf diseases of *Eucalyptus* 413
New species of *Stenella* from India 516
New synnematous foliicolous hyphomycetes from India 521
Minutoexipula tuckerae gen. et sp. nov., a new lichenicolous deuteromycete on *Pertusaria texana* in the United States 587
Ticogloea, a new genus of hyphomycetes from roots of *Ticodendron incognitum* from Costa Rica 660
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677
Cryptophialoidea fasciculata sp. nov. and *C. manifesta* comb. nov. from Malaysia 686
Observations on mangrove fungi from Macau and Hong Kong, with the description of two new ascomycetes: *Diaporthe salsuginosa* and *Aniptodera haispora* 699
Aquatic fungi on rachides of *Livistona* in the Western Province of Papua New Guinea 719
Gibberella tumida sp. nov. – teleomorph of *Fusarium tumidum* from gorse in New Zealand 729
Leptographium elegans: a new species from Taiwan 781
Mimema venturae sp. nov. on *Dalbergia miscolobium* in Brazil 786
Five new species of *Rotiferophthora* isolated from dung 833
Dactylella megalobrocha, a new species of nematophagous fungus with constricting rings 845
A new species of *Harposporium* infecting *Rhabditis* nematodes with microspores 854
Nematode-trapping species of *Monacrosporium* with special reference to two new species 862
Aspergillus implicatus, a new species isolated from Ivory Coast forest soil 869
A monograph of *Sphaerophragmium* (Uredinales) 907
Sclerotiniaceous species on *Rubus chamaemorus*: morphoanatomical and RFLP studies 923
Aniptodera salsuginosa, a new mangrove-inhabiting ascomycete, with observations on the effect of salinity on ascospore appendage morphology 931
Cortinarius horakii, a new species from Chile 937
Cordyceps khaoyaiensis and *C. pseudomilitaris*, two new pathogens of lepidopteran larvae from Thailand 939
Perennioporia formosana sp. nov. on *Prunus* in Taiwan 954
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
A new species of *Phloeospora* causing leaf spot on *Trichilia connaroides* 1192
Long-spored *Tulasnella* species from Devon, with additional notes on allantoid-spored species 1235
Growth of *Coniophora puteana* modified by a gall-inducing mycoparasite 1263
Graphium pseudormiticum sp. nov.: a new hyphomycete with unusual conidiogenesis 1272
New species of *Pseudocercospora* and *Stenella* from India 1277
New species and records of *Eucantharomyces*, with remarks on their perithecial apex 1303
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334
Diaporthe toxica sp. nov., the cause of lupinosis in sheep 1364
The genus *Phyllachora* from Australia: two new taxa, *P. velatispora* var. *velatispora* and *P. velatispora* var. *hilliannae*, on *Grevillea* and notes on *P. grevilleae* 1402

New subspecies
The genus *Phyllachora* from Australia: observations on taxa from *Callistemon* species 1393

New varieties
The genus *Phyllachora* from Australia: two new taxa, *P. velatispora* var. *velatispora* and *P. velatispora* var. *hilliannae*, on *Grevillea* and notes on *P. grevilleae* 1402

Nodulisporium cecidiogenes
Growth of *Coniophora puteana* modified by a gall-inducing mycoparasite 1263

Notofagus dombeyi
Cortinarius horakii, a new species from Chile 937

Nucleotide sequence
Nucleotide sequence of the rDNA spacer 1 enables identification of isolates of *Colletotrichum* as *C. acutatum* 186

Numerical analysis
Enzymic studies as an aid to the taxonomy of the *Lyophyllum decastes* complex 375

Nutrient availability
Effects of soil moisture, temperature and nutrient availability on the population dynamics of *Mucor piriformis* 342

Nutrient movement
The role of source-sink relationships in translocation during sclerotial formation by *Morchella esculenta* 1409

Nutrient uptake
Betaine transport in *Fusarium graminearum* 176

Obeliospora triappendiculata
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677

Oidiodendron setiferum
A new record of *Oidiodendron setiferum* 604

Ophiociliomyces bauhiniae
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107

Ophiostoma
The polyphyletic origins of ophiostomatoid fungi 1
Fungi associated with infructescences of *Protea* species in South Africa, including a new species of *Ophiostoma* 369

Ophiostoma novo-ulmi
Effect of temperature on growth and cerato-ulmin production of *Ophiostoma novo-ulmi* and *O. ulmi* 408

Ophiostoma splendens
Fungi associated with infructescences of *Protea* species in South Africa, including a new species of *Ophiostoma* 369

Ophiostoma ulmi
A glycoprotein isolated from culture filtrates of *Ophiostoma ulmi* as a manosome-inducing elicitor on elm callus 295
Effect of temperature on growth and cerato-ulmin production of *Ophiostoma novo-ulmi* and *O. ulmi* 408
Contrasting structure of European and North American populations of *Ophiostoma ulmi* 576
Induction and genetic characterization of ultraviolet-sensitive mutants in the elm tree pathogen *Ophiostoma ulmi* (*sensu lato*) 943

Ophiostomatoid fungi
The polyphyletic origins of ophiostomatoid fungi 1

Orchid mycorrhizas
Involvement of exodermal passage cells in mycorrhizal infection of some orchids 672

Orthotomicus erosus
Graphium pseudormiticum sp. nov.: a new hyphomycete with unusual conidiogenesis 1272

Osmotic potential
Effect of osmotic potential on the germination of conidia and colony growth of *Verticillium lecanii* 384

Oxydothis linospadicis
New *Oxydothis* species associated with palm leaf spots in north Queensland, Australia 213

Oxydothis oraniopsis
New *Oxydothis* species associated with palm leaf spots in north Queensland, Australia 213

Oxydothis parasitica
New *Oxydothis* species associated with palm leaf spots in north Queensland, Australia 213

Paecilomyces farinosus
Mutants of entomopathogenic fungi that germinate and grow at reduced water activities and reduced relative humidities are more virulent to *Nepotettix virescens* (green leafhopper) than the parental strains 1329

Paecilomyces fumoso-roseus
Influence of culture age on rate of conidiospore germination in four deuteromycetous entomogenous fungi 763

Panagrellus redivivus
Competitive interactions between two nematophagous fungi during infection and digestion of the nematode *Panagrellus redivivus* 1458
Paracryptophiale kamaruddinii
Paracryptophiale kamaruddinii gen. et sp. nov. from submerged litter in Malaysia 125
parasitic fungi
Eurychasmopsis multisecunda gen. et sp. nov., a parasite of the suctorian ciliate *Podophrya* 105
Paraulocladium fabisporum
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677
Patch clamping
Patch clamping fungal membranes: a new perspective on ion transport 257
Pathogenicity
Interspecific hybridisation between *Pseudocercosporella herpotrichoides* and *P. anguioides* achieved through protoplast fusion 47
Purification and characterization of a xylanase from *Bipolaris sorokiniana* 67
The occurrence and pathogenicity of *Rhizoctonia* fungi in South Australian plant nurseries 77
Characteristics of some *Rhizoctonia* spp. from South Australian plant nurseries 83
Growth of human pathogenic isolates of *Sporothrix schenckii* on indigenous and exotic wood species in South Africa 121
Pathogenicity, morphology and isozyme variability among isolates of *Aphanomyces* spp. from weeds and various crop plants 231
Pathogenicity of *Colletotrichum acutatum* and *C. gloeosporioides* on leaves of *Hevea* spp. 264
Isolation of *Fusarium* species from common broad-leaved weeds and their pathogenicity to winter wheat 776
Genetic analysis of variation of pathogenicity in *Nectria haematococca* (*Fusarium solani*) on *Cucurbita* 1183
Histopathology of infection of the palm *Washingtonia filifera* with the pink bud rot fungus *Penicillium vermoesenii* 1195
Pectinases
Anastomosis group (AG) affinity of pectic isozyme (Zymogram) groups (ZG) of *Rhizoctonia solani* from the Western Australian cereal-belt 1369
Penicillium
Colour standards: a review and evaluation in relation to *Penicillium* taxonomy 635
A chemotaxonomic study of the terverticillate penicillia based on high performance liquid chromatography of secondary metabolites 1317
Penicillium aurantiogriseum
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium aurantiovirens
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium chrysogenum
Evaluation of *Penicillium chrysogenum* and its antifungal extracts as potential biological control agents against *Botrytis fabae* on faba beans 1117
Penicillium clavigerum
Independent origins of the synnematous *Penicillium* species, *P. duclauxii*, *P. clavigerum*, and *P. vulpinum*, as assessed by two ribosomal DNA regions 250
Penicillium cyclopium
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium duclauxii
Independent origins of the synnematous *Penicillium* species, *P. duclauxii*, *P. clavigerum*, and *P. vulpinum*, as assessed by two ribosomal DNA regions 250
Penicillium freii
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium melanoconidium
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium neoechinulatum
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium polonicum
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium tricolor
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium vermoesenii
Histopathology of infection of the palm *Washingtonia filifera* with the pink bud rot fungus *Penicillium vermoesenii* 1195
Penicillium viridicatum
Chemotaxonomy of *Penicillium aurantiogriseum* and related species 481
Penicillium vulpinum
Independent origins of the synnematous *Penicillium* species, *P. duclauxii*, *P. clavigerum*, and *P. vulpinum*, as assessed by two ribosomal DNA regions 250
Perameles nasuta
Sporocarpic Endogonales and Glomales in the scats of *Rattus* and *Perameles* 246
Perennioporia formosana
Perennioporia formosana sp. nov. on *Prunus* in Taiwan 954
Pertusaria texana
Minutoexipula tuckerae gen. et sp. nov., a new lichenicolous deuteromycete on *Pertusaria texana* in the United States 587
Peyritschiella protea
Further records of Laboulbeniales from collections of British Coleoptera 433
pH
pH and Ca^{2+} dependent galvanotropism of filamentous fungi: implications and mechanisms 301
Phialina lachnobrachya
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Phialocephala humicola
Conidiogenesis in *Phialocephala humicola* 745
Phialophthora graminicola
Identification of fungi in the *Gaeumannomyces–Phialophthora* complex by RFLPs of PCR-amplified ribosomal DNAs 219
Phlegmacium
Cortinarius horakii, a new species from Chile 937
Phloeospora trichiliae
A new species of *Phloeospora* causing leaf spot on *Trichilia connaroides* 1192
Phoma fimeti
First record of intracellular sporulation by a coelomycete fungus 1390
Phomopsis leptostromiformis
Diaporthe toxica sp. nov., the cause of lupinosis in sheep 1364
Phomopsis subordinaria
Variability for isozyme, vegetative compatibility and RAPD markers in natural populations of *Phomopsis subordinaria* 267
Phosphoinositide
Phosphoinositide turnover does not mediate the effects of light or choline, or the relief of derepression of glucose metabolism in filamentous fungi 291
Phosphorus
Transfer of phosphorus from *Rhizoctonia solani* to the mycoparasite *Arthrobotrys oligospora* 1065
Phyllachora callistemonis
The genus *Phyllachora* from Australia: observations on taxa from *Callistemon* species 1393
Phyllachora callistemonis* subsp. *similis
The genus *Phyllachora* from Australia: observations on taxa from *Callistemon* species 1393
Phyllachora grevilleae
The genus *Phyllachora* from Australia: two new taxa, *P. velatispora* var. *velatispora* and *P. velatispora* var. *hilliannae*, on *Grevillea* and notes on *P. grevilleae* 1402
Phyllachora langdonii
The genus *Phyllachora* from Australia: observations on taxa from *Callistemon* species 1393
Phyllachora velatispora
The genus *Phyllachora* from Australia: two new taxa, *P. velatispora* var. *velatispora* and *P. velatispora* var. *hilliannae*, on *Grevillea* and notes on *P. grevilleae* 1402
Phylogeny
Phylogenetic relationships within the genus *Metarhizium* based on 28S rRNA sequences and isozyme comparison 225
Phylogeny of *Metarhizium*: analysis of ribosomal DNA sequence data 547
Comparative studies on *Phytophthora megasperma* isolates from chickpea collected in Australia and Spain 1284
Phytoalexins
A glycoprotein isolated from culture filtrates of *Ophiostoma ulmi* as a manosome-inducing elicitor on elm callus 295
Phytophthora arecae
Isozyme diversity in *Phytophthora palmivora*: evidence for a southeast Asian centre of origin 1035
Phytophthora isolates from coconut plantations in Indonesia and Ivory Coast: characterization and identification by morphology and isozyme analysis 1379

Phytophthora capsici
Evidence for distinct isozyme subgroups within *Phytophthora citricola* and close relationships with *P. capsici* and *P. citrophthora* 189
Phytophthora citricola
Evidence for distinct isozyme subgroups within *Phytophthora citricola* and close relationships with *P. capsici* and *P. citrophthora* 189
Phytophthora citrophthora
Evidence for distinct isozyme subgroups within *Phytophthora citricola* and close relationships with *P. capsici* and *P. citrophthora* 189
An integrated study of morphological and isozyme patterns found within a worldwide collection of *Phytophthora citrophthora* and a redescription of the species 1291
Phytophthora infestans
Inheritance of mitochondrial DNA in *Phytophthora infestans* 569
Phytophthora katsurae
Phytophthora isolates from coconut plantations in Indonesia and Ivory Coast: characterization and identification by morphology and isozyme analysis 1379
Phytophthora megasperma
Comparative studies on *Phytophthora megasperma* isolates from chickpea collected in Australia and Spain 1284
Phytophthora palmivora
Isozyme diversity in *Phytophthora palmivora*: evidence for a southeast Asian centre of origin 1035
The role of the plasma membrane in differentiation of *Phytophthora palmivora* zoospores 1051
Phytophthora isolates from coconut plantations in Indonesia and Ivory Coast: characterization and identification by morphology and isozyme analysis 1379
Phytophthora parasitica
Intraspecific polymorphism of *Phytophthora parasitica* revealed by analysis of mitochondrial DNA restriction fragment length polymorphism 562
Phytotoxins
The toxicity of phytotoxins from *Cercospora arachidicola* and cercosporin from *Cercospora* species to tobacco, Swiss chard and groundnut plants 1245
Picea abies
Moserella radicicola gen. et sp. nov., a new hypogeous species of Leotiales on ectomycorrhizas of *Picea abies* 1334
Pichia stipitis
Theoretical and practical aspects of ploidy estimations in *Pichia stipitis* 716
Pinus resinosa
Genetic diversity among natural populations of endophytic *Lophodermium pinastri* from *Pinus resinosa* 740
Pinus sylvestris
Spatial distribution of *Laccaria bicolor* genets reflected by sporocarps after removal of litter and humus layers in a *Pinus sylvestris* forest 726
Anamorphic and teleomorphic characteristics of a uninucleate *Rhizoctonia* sp. isolated from the roots of nursery grown conifer seedlings 1044
Pisolithus tinctorius
Presence of a motile tubular vacuole system in different phyla of fungi 985
Pithylella hispida
First contribution to the knowledge of the Leotiales of Baja California and adjacent areas 1137
Pityrosporum canis
Investigation of the value of β-glucan-specific fluorochromes for predicting the β-glucan content of the cell walls of zoopathogenic fungi 694
Plasma membrane
The role of the plasma membrane in differentiation of *Phytophthora palmivora* zoospores 1051
Plasmids
Studies on function and mobility of mitochondrial plasmids from *Claviceps purpurea* 511
Pleurotus
Genetic variability and systematics of eleven *Pleurotus* species based on isozyme analysis 329
Ploidy
Theoretical and practical aspects of ploidy estimations in *Pichia stipitis* 716
Podophrya
Eurychasmopsis multisecunda gen. et sp. nov., a parasite of the suctorian ciliate *Podophrya* 105
Polymerase chain reaction
The use of random amplified polymorphic DNA to identify pathotype and detect variation in *Pseudocercosporella herpotrichoides* 13
Typing truffle species by PCR amplification of the ribosomal DNA spacers 37
Intraspecific genetic variation in *Heterobasidion annosum* revealed by amplification of minisatellite DNA 57
Identification of fungi in the *Gaeumannomyces–Phialophthora* complex by RFLPs of PCR-amplified ribosomal DNAs 219
Comparative analysis of molecular and biological characteristics of strains of *Beauveria brongniartii* isolated from insects 322
Characterization of isolates of the entomopathogenic fungus *Metarhizium anisopliae* by RAPD-PCR 1077
Variability among isolates of the nematophagous fungus *Hirsutella rhossiliensis* 1127
Population analysis
Effects of soil moisture, temperature and nutrient availability on the population dynamics of *Mucor piriformis* 342
Population structure
Contrasting structure of European and North American populations of *Ophiostoma ulmi* 576
Populus
Comparative studies of the poplar rusts *Melampsora medusae, M. larici-populina* and their interspecific hybrid *M. medusae-populina* 889
Presidential address
Fungal adhesion 961
Protea repens
Fungi associated with infructescences of *Protea* species in South Africa, including a new species of *Ophiostoma* 369
Proteolytic enzymes
Proteolytic activity amongst selected *Saprolegnia* species 389
Protoplast fusion
Interspecific hybridisation between *Pseudocercosporella herpotrichoides* and *P. anguioides* achieved through protoplast fusion 47
Overcoming vegetative incompatibility within and between pathotypes of *Pseudocercosporella herpotrichoides* by protoplast fusion 653
Prunus mume
Perennioporia formosana sp. nov. on *Prunus* in Taiwan 954
Pseudocercospora aphanamixidis
New species of *Pseudocercospora* and *Stenella* from India 1277
Pseudocercospora bauhiniigena
New species of *Pseudocercospora* and *Stenella* from India 1277
Pseudocercosporella anguioides
Interspecific hybridisation between *Pseudocercosporella herpotrichoides* and *P. anguioides* achieved through protoplast fusion 47
Pseudocercosporella herpotrichoides
The use of random amplified polymorphic DNA to identify pathotype and detect variation in *Pseudocercosporella herpotrichoides* 13
Interspecific hybridisation between *Pseudocercosporella herpotrichoides* and *P. anguioides* achieved through protoplast fusion 47
Cultural variability in the cereal eyespot pathogen *Pseudocercosporella herpotrichoides* 396
Overcoming vegetative incompatibility within and between pathotypes of *Pseudocercosporella herpotrichoides* by protoplast fusion 653
Genetic relationships in *Pseudocercosporella herpotrichoides* determined from DNA relatedness 1059
Puccinia cygnorum
Puccinia cygnorum sp. nov. on *Kunzea ericifolia* in Australia 22
Pycnidial development
Development of conidiomata in *Ciliochorella mangiferae* 857
Pythium aquatile
Immuno-enzymatic staining procedure for *Pythium* species with filamentous non-inflated sporangia in soilless cultures 535
Pythium coloratum
Immuno-enzymatic staining procedure for *Pythium* species with filamentous non-inflated sporangia in soilless cultures 535
Pythium fluminum
Pythium fluminum var. *fluminum* from pond water in Osaka 982
Pythium marsipium
Pythium marsipium from pond water in Osaka 920
Radionucleotide contamination
Changes in micromycete communities in soil in response to pollution by long-lived radionucleotides emitted in the Chernobyl accident 789
Random amplified polymorphic DNA
Variability for isozyme, vegetative compatibility and RAPD markers in natural populations of *Phomopsis subordinaria* 267
Use of the RAPD procedure for the identification of *Trichoderma* strains 531
Comparative studies on *Phytophthora megasperma* isolates from chickpea collected in Australia and Spain 1284

RAPD-PCR
Characterization of isolates of the entomopathogenic fungus *Metarhizium anisopliae* by RAPD-PCR 1077
Variability among isolates of the nematophagous fungus *Hirsutella rhossiliensis* 1127
Rattus villosissimus
Sporocarpic Endogonales and Glomales in the scats of *Rattus* and *Perameles* 246
Redbia trichomambusta
The mycobiota of the weed *Chromolaena odorata* in southern Brazil with particular reference to fungal pathogens for biological control 1107
Restriction Fragment Length Polymorphism
Mitochondrial DNA restriction fragment length polymorphisms in natural populations of *Lentinula edodes* 169
Identification of fungi in the *Gaeumannomyces–Phialophthora* complex by RFLPs of PCR-amplified ribosomal DNAs 219
Comparative analysis of molecular and biological characteristics of strains of *Beauveria brongniartii* isolated from insects 322
Intraspecific polymorphism of *Phytophthora parasitica* revealed by analysis of mitochondrial DNA restriction fragment length polymorphism 562
Molecular markers in Australian isolates of *Rhizoctonia solani* 665
Genetic diversity among natural populations of endophytic *Lophodermium pinastri* from *Pinus resinosa* 740
Sclerotiniaceous species on *Rubus chamaemorus*: morphoanatomical and RFLP studies 923
Retrotransposons
Occurrence of a retrotransposon-like sequence among different formae speciales and races of *Fusarium oxysporum* 993

Sclerotiniaceous species on *Rubus chamaemorus*: morphoanatomical and RFLP studies 923
Saccharomyces cerevisiae
Insertions and G–C rich DNA sequences in the mitochondrial large ribosomal subunit of *Leptosphaeria maculans* 445
Mechanisms of action of the antibiotic flavipin on *Monilinia laxa* and *Saccharomyces cerevisiae* 874
Specific binding sites for human luteinizing hormone in *Neurospora crassa* and *Saccharomyces cerevisiae* 1229
Sand dunes
Gigaspora gigantea: seasonal abundance and ageing of spores in a sand dune 453
Gigaspora gigantea: parasitism of spores by fungi and actinomycetes 458
Saprolegnia diclina
Proteolytic activity amongst selected *Saprolegnia* species 389
Saprolegnia ferax
Proteolytic activity amongst selected *Saprolegnia* species 389
Saprolegnia parasitica
Proteolytic activity amongst selected *Saprolegnia* species 389
Repeated zoospore emergence in *Saprolegnia parasitica* 810
Sassafras
Urosporellopsis taiwanensis gen. et sp. nov., a new amphisphaeriaceous ascomycete on *Sassafras* from Taiwan 101

Scanning electron microscopy
Stephanocysts in *Crepidotus applanatus* 419
Fungal adhesion 961
Schizophyllum commune
Assignment of genes to pulse-field separated chromosomes of *Schizophyllum commune* 689
Sclerographium indicum
New synnematous foliicolous hyphomycetes from India 521
Sclerotial formation
The role of source-sink relationships in translocation during sclerotial formation by *Morchella esculenta* 1409
Sclerotinia tetraspora
Sclerotiniaceous species on *Rubus chamaemorus*: morphoanatomical and RFLP studies 923
Scutellospora heterogama
Stability and heritability of fatty acid methyl ester profiles of glomalean endomycorrhizal fungi 1419
Scutisporus brunneus
Henicospora longissima sp. nov., *Obeliospora triappendiculata* sp. nov., *Paraulocladium fabisporum* sp. nov. and other hyphomycetes from Malaya 677
Secondary metabolism
Isolation and characterization of morphological variants of *Aspergillus parasiticus* deficient in secondary metabolite production 645
Secondary metabolites
In vitro activity of 6-pentyl-a-pyrone, a metabolite of *Trichoderma harzianum*, in the inhibition of *Rhizoctonia solani* and *Fusarium oxysporum* f. sp. *lycopersici* 1207
A chemotaxonomic study of the terverticillate penicillia based on high performance liquid chromatography of secondary metabolites 1317
Variation in pyrone production, lytic enzymes and control of rhizoctonia root rot of wheat among single-spore isolates of *Trichoderma koningii* 1357
Septal pores
Occlusion of septal pores in filamentous fungi 1089
Septation
Occlusion of septal pores in filamentous fungi 1089
Serpula lachrymans
A monoclonal antibody for the detection of *Serpula lachrymans* 356
Sexual incompatibility
Sexual incompatibility in *Suillus variegatus* 545
Sivanesania
Sivanesania, a new botryosphaeriaceous ascomycete genus on *Rubus* from Taiwan 44
Sivanesania rubi
Sivanesania, a new botryosphaeriaceous ascomycete genus on *Rubus* from Taiwan 44
Smut fungi
Hot fixation of fungal spores for transmission electron microscopy: application to thick-walled spores of the smut fungus *Entorrhiza* 799
Soil fungi
A new record of *Oidiodendron setiferum* 604
Anaerobic growth of fungal mycelium from soil particles onto nutrient-free silica gel 761
Changes in micromycete communities in soil in response to pollution by long-lived radionucleotides emitted in the Chernobyl accident 789
Analysis of micromycete communities in soil: a critique of methods 796
Aspergillus implicatus, a new species isolated from Ivory Coast forest soil 869
Somatic compatibility
Spatial distribution of *Laccaria bicolor* genets reflected by sporocarps after removal of litter and humus layers in a *Pinus sylvestris* forest 726
Sordariaceae
Molecular characterization of mating-type loci in selected homothallic species of *Neurospora*, *Gelasinospora* and *Anixiella* 1309
Sphaeronaemella
The polyphyletic origins of ophiostomatoid fungi 1
Sphaerophragmium albiziae
A monograph of *Sphaerophragmium* (Uredinales) 907
Sphaerophragmium ornatum
A monograph of *Sphaerophragmium* (Uredinales) 907
Sphaerostilbella
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Splash dispersal
Splash dispersal of conidia of *Fusarium culmorum* and *Fusarium avenaceum* 506
Spore germination
Involvement of ethylene in spore germination and mycelial growth of *Alternaria alternata* 118
Spore germination in the entomopathogenic genus *Aschersonia* 165
Spore ultrastructure
Hot fixation of fungal spores for transmission electron microscopy: application to thick-walled spores of the smut fungus *Entorrhiza* 799
Spore wall
Ultrastructural observations and a computer model of the helicoidal appearance of the spore wall of *Glomus geosporum* 307
Sporendocladia
Conidiogenesis in *Phialocephala humicola* 745
Sporisorium
Products of teliospore germination in *Sporisorium* spp. 467
Sporogenesis
Light and electron microscopy of *Ustilago maydis* hyphae in maize 347
Gigaspora gigantea: seasonal abundance and ageing of spores in a sand dune 453
Gigaspora gigantea: parasitism of spores by fungi and actinomycetes 458
Sporormiella lasiocarpa
A new hairy species of *Sporormiella* 10
Sporothrix
Fungi associated with infructescences of *Protea* species in South Africa, including a new species of *Ophiostoma* 369
Leptographium elegans: a new species from Taiwan 781
Sporothrix schenckii
Growth of human pathogenic isolates of *Sporothrix schenckii* on indigenous and exotic wood species in South Africa 121
Sporotrichosis
Growth of human pathogenic isolates of *Sporothrix schenckii* on indigenous and exotic wood species in South Africa 121
Sporulation
Cellulose-triggered sporulation in the galactose oxidase-producing fungus *Cladobotryum* (*Dactylium*) *dendroides* NRRL 2903 and its reidentification as a species of *Fusarium* 474
First record of intracellular sporulation by a coelomycete fungus 1390
Spumula debile
A monograph of *Sphaerophragmium* (Uredinales) 907
Squalene synthesis
Distribution of zaragozic acids (squalestatins) among filamentous ascomycetes 733
Squalestatins
Distribution of zaragozic acids (squalestatins) among filamentous ascomycetes 733
Stachybotrys elegans
Stachybotrys elegans: a destructive mycoparasite of Rhizoctonia solani 493
Stanhopea tigrina
Involvement of exodermal passage cells in mycorrhizal infection of some orchids 672
Stenella brideliicola
New species of *Stenella* from India 516
Stenella fabacearum
New species of *Stenella* from India 516
Stenella murrayae
New species of *Pseudocercospora* and *Stenella* from India 1277
Stenella sonapathriensis
New species of *Pseudocercospora* and *Stenella* from India 1277
Stenella telosmae
New species of *Stenella* from India 516
Stephanocysts
Stephanocysts in *Crepidotus applanatus* 419
Sterol profiles
Combining sterol and fatty acid profiles for the characterization of fungi 593
Sterols
A microscopic evaluation of the sensitivity of *Venturia inaequalis* populations to sterol demethylation inhibitors 619
Stigmatomyces aciurae
Stigmatomyces species on guava fruit flies in seasonal and non-seasonal neotropical forest environments 403
Stigmatomyces verruculosus
Stigmatomyces species on guava fruit flies in seasonal and non-seasonal neotropical forest environments 403
Storage
Mechanical properties of the mushroom, *Agaricus bisporus* 241
Suillus variegatus
Sexual incompatibility in *Suillus variegatus* 545

Symbiosis
Fungal enzymes degrading plant cell walls: their possible significance in the ectomycorrhizal symbiosis 1345
Synnema formation
Graphium pseudormiticum sp. nov.: a new hyphomycete with unusual conidiogenesis 1272
Systematics
Mating systems in *Marasmius*: additional evidence to support sectional consistency 200
Genetic variability and systematics of eleven *Pleurotus* species based on isozyme analysis 329
Cellulose-triggered sporulation in the galactose oxidase-producing fungus *Cladobotryum* (*Dactylium*) *dendroides* NRRL 2903 and its reidentification as a species of *Fusarium* 474
Phylogeny of *Metarhizium*: analysis of ribosomal DNA sequence data 547
Characterization of nuclear ribosomal DNA (rDNA) in *Gaeumannomyces graminis* and correlation of rDNA variation with *G. graminis* varieties 553
Armillaria species identified in China and Japan 607
Length variation in the internal transcribed spacers of ribosomal DNA in chanterelles 614
Colour standards: a review and evaluation in relation to *Penicillium* taxonomy 635
Presence of a motile tubular vacuole system in different phyla of fungi 985
Species delimitation in North American species of *Armillaria* as measured by DNA reassociation 1005
Talaromyces
Independent origins of the synnematous *Penicillium* species, *P. duclauxii*, *P. clavigerum*, and *P. vulpinum*, as assessed by two ribosomal DNA regions 250
Tandonella dolichoides
New synnematous foliicolous hyphomycetes from India 521
Tapesia yallundae
The use of random amplified polymorphic DNA to identify pathotype and detect variation in *Pseudocercosporella herpotrichoides* 13
Teliospore germination
Products of teliospore germination in *Sporisorium* spp. 467
Mimema venturae sp. nov. on *Dalbergia miscolobium* in Brazil 786
Telosma pallida
New species of *Stenella* from India 516
Temperature
Effects of soil moisture, temperature and nutrient availability on the population dynamics of *Mucor piriformis* 342
Effect of temperature on growth and cerato-ulmin production of *Ophiostoma novo-ulmi* and *O. ulmi* 408
Separation of *Metarhizium anisopliae* strains by temperature dependent germination rates 1253
Teratomyces philonthi
Further records of Laboulbeniales from collections of British Coleoptera 433
Thanatephorus cucumeris
Characteristics of some *Rhizoctonia* spp. from South Australian plant nurseries 83
Thaxterogaster
Fruiting of hypogeous fungi in dry sclerophyll forest in Tasmania, Australia: seasonal variation and annual production 1173
Ticodendron incognitum
Ticogloea, a new genus of hyphomycetes from roots of *Ticodendron incognitum* from Costa Rica 660
Ticogloea
Ticogloea, a new genus of hyphomycetes from roots of *Ticodendron incognitum* from Costa Rica 660
Ticogloea guttulata
Ticogloea, a new genus of hyphomycetes from roots of *Ticodendron incognitum* from Costa Rica 660
Transformation
Cloning the *Coprinus bilanatus TRP2* gene and its use as a selectable marker in transformation 179
Transmission electron microscopy
Hot fixation of fungal spores for transmission electron microscopy: application to thick-walled spores of the smut fungus *Entorrhiza* 799
Fungal adhesion 961
Ultrastructure of *Antennospora salina* comb. nov. 997
Trechispora candidissima
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Trechispora clancularis
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Trechispora hymenocystis
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Trechispora molusca
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Trechispora polygonospora
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Trechispora regularis
Poroid species in *Trechispora* and the use of calcium oxalate crystals for species identification 1153
Triacutus subcuticularis
Five new species of *Rotiferophthora* isolated from dung 833
Trichilia connaroides
A new species of *Phloeospora* causing leaf spot on *Trichilia connaroides* 1192
Trichoderma
Taxonomy and phylogeny of *Gliocladium* analysed from nuclear large subunit ribosomal DNA sequences 625
Trichoderma hamatum
Use of the RAPD procedure for the identification of *Trichoderma* strains 531
Trichoderma harzianum
Use of the RAPD procedure for the identification of *Trichoderma* strains 531
In vitro activity of 6-pentyl-a-pyrone, a metabolite of *Trichoderma harzianum*, in the inhibition of *Rhizoctonia solani* and *Fusarium oxysporum* f. sp. *lycopersici* 1207
Structure-activity relationships among isoflavonoids with regard to their antifungal properties 1376
Trichoderma koningii
Variation in pyrone production, lytic enzymes and control of rhizoctonia root rot of wheat among single-spore isolates of *Trichoderma koningii* 1357
Trichoderma viride
Use of the RAPD procedure for the identification of *Trichoderma* strains 531
Tripospermum pes-gallinae
Notes on two *Tripospermum* species: *T. pes-gallinae* and *T. variabile* 879
Tripospermum variabile
Notes on two *Tripospermum* species: *T. pes-gallinae* and *T. variabile* 879
Truffles
Typing truffle species by PCR amplification of the ribosomal DNA spacers 37
Tuber
Typing truffle species by PCR amplification of the ribosomal DNA spacers 37
Tulasnella
Globose and ellipsoid-spored *Tulasnella* species from Devon and Surrey, with a key to the genus in Europe 1431
Tulasnella brinkmannii
Long-spored *Tulasnella* species from Devon, with additional notes on allantoid-spored species 1235
Tulasnella calospora
Long-spored *Tulasnella* species from Devon, with additional notes on allantoid-spored species 1235
Tulasnella deliquescens
Long-spored *Tulasnella* species from Devon, with additional notes on allantoid-spored species 1235
Tulasnella quasiflorens
Long-spored *Tulasnella* species from Devon, with additional notes on allantoid-spored species 1235
Ulex europaeus
Gibberella tumida sp. nov. – teleomorph of *Fusarium tumidum* from gorse in New Zealand 729
Ultrastructure
Ultrastructural observations and a computer model of the helicoidal appearance of the spore wall of *Glomus geosporum* 307
Colonization of beech leaves (*Fagus sylvatica*) by the endophyte *Discula umbrinella* (teleomorph: *Apiognomonia errabunda*) 423
Stachybotrys elegans: a destructive mycoparasite of Rhizoctonia solani
Enhanced labelling of concanavalin A binding sites in fungal endomembranes using a double-sided, indirect method 769

Dactylella megalobrocha, a new species of nematophagous fungus with constricting rings 845
Comparative studies of the poplar rusts *Melampsora medusae*, *M. larici-populina* and their interspecific hybrid *M. medusae-populina* 889
Ultrastructure of *Antennospora salina* comb. nov. 997
Ultraviolet irradiation
Induction and genetic characterization of ultraviolet-sensitive mutants in the elm tree pathogen *Ophiostoma ulmi* (*sensu lato*) 943
Uredinales
A monograph of *Sphaerophragmium* (Uredinales) 907
Urediniospores
The role of hydrophobicity in attachment of urediniospores and sporelings of *Uromyces viciae-fabae* 1217
Uromyces viciae-fabae
The role of hydrophobicity in attachment of urediniospores and sporelings of *Uromyces viciae-fabae* 1217
Urosporella coccifera
Urosporellopsis taiwanensis gen. et sp. nov., a new amphisphaeriaceous ascomycete on *Sassafras* from Taiwan 101
Urosporellopsis taiwanensis
Urosporellopsis taiwanensis gen. et sp. nov., a new amphisphaeriaceous ascomycete on *Sassafras* from Taiwan 101
Ustilago maydis
Light and electron microscopy of *Ustilago maydis* hyphae in maize 347
Vacuole system
Presence of a motile tubular vacuole system in different phyla of fungi 985
Vegetative compatibility
Variability for isozyme, vegetative compatibility and RAPD markers in natural populations of *Phomopsis subordinaria* 267
Vegetative compatibility in populations of *Fusarium oxysporum* from wild carnations 1415
Vegetative incompatibility
Overcoming vegetative incompatibility within and between pathotypes of *Pseudocercosporella herpotrichoides* by protoplast fusion 653
Venturia inaequalis
A microscopic evaluation of the sensitivity of *Venturia inaequalis* populations to sterol demethylation inhibitors 619
Verticillium lecanii
Effect of osmotic potential on the germination of conidia and colony growth of *Verticillium lecanii* 384
Influence of culture age on rate of conidiospore germination in four deuteromycetous entomogenous fungi 763
Invasion and development of *Verticillium lecanii* in the western flower thrips, *Frankliniella occidentalis* 1025
Volatile compounds
Production of fruity aroma by *Neurospora* from beiju 1300
Volvariella volvacea
Production of cellulases and hemicellulases by the straw mushroom *Volvariella volvacea* 1019
Vulpia ciliata
First record of intracellular sporulation by a coelomycete fungus 1390
Washingtonia filifera
Histopathology of infection of the palm *Washingtonia filifera* with the pink bud rot fungus *Penicillium vermoesenii* 1195
Water activity
Mutants of entomopathogenic fungi that germinate and grow at reduced water activities and reduced relative humidities are more virulent to *Nepotettix virescens* (green leafhopper) than the parental strains 1329
Water potential
Effects of soil moisture, temperature and nutrient availability on the population dynamics of *Mucor piriformis* 342
Water relations
Water relations of *Alternaria alternata*, *Cladosporium cladosporioides*, *Cladosporium sphaerospermum*, *Curvularia lunata* and *Curvularia pallescens* 91
Xylanase
Purification and characterization of a xylanase from *Bipolaris sorokiniana* 67
Zaragosic acids
Distribution of zaragozic acids (squalestatins) among filamentous ascomycetes 733
Zoopathogenic fungi
Investigation of the value of β-glucan-specific fluorochromes for predicting the β-glucan content of the cell walls of zoopathogenic fungi 694
Zoospore motility
Loss and recovery of zoospore motility in an isolate of *Aphanomyces* from a diseased fish 1463
Zoospore release
Repeated zoospore emergence in *Saprolegnia parasitica* 810
Zoospore ultrastructure
Repeated zoospore emergence in *Saprolegnia parasitica* 810
The role of the plasma membrane in differentiation of *Phytophthora palmivora* zoospores 1051
